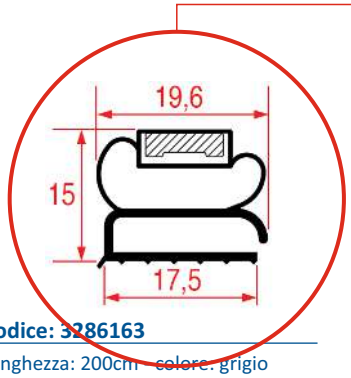
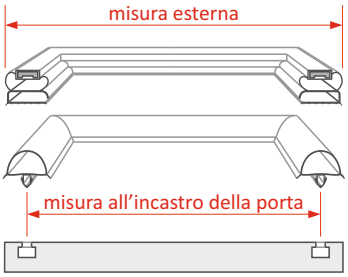
guarnizioni per porte frigorifere



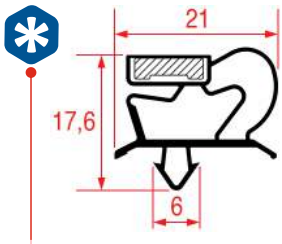
codice: 3286163
lunghezza: 200cm - colore: grigio

come ordinare una guarnizione

per ordinare una guarnizione nuova si deve sezionare quella usata per poter confrontare le sezioni sul nostro archivio e trovare il codice corretto.
è utile rilevare anche marca e modello, ove possibile, del macchinario su cui va montata.
questo simbolo identifica la calamita

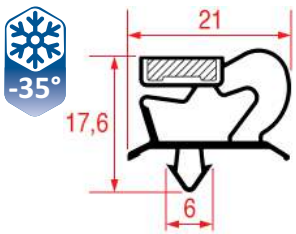


per quanto riguarda le dimensioni si possono prendere in due modi:
- misura esterna, un po' difficile quando la guarnizione è vecchia e deformata, pertanto è meglio prenderle prima di smontarla.
- misura all'incastro della porta, questa è più semplice e precisa perché la si può prendere direttamente sull'interasse dell'incastro su porta o sportello.



codice: 3186874
lunghezza: 200cm - colore: grigio

le resistenze possono essere acquistate in fasci o rotolo* (la lunghezza e il colore sono indicati sotto al codice).
gli angoli dovranno essere tagliati a 45° o altro e incollati direttamente in opera dall'acquirente o da un tecnico.
le colle adatte sono quelle contenenti il cianoacrilato come SuperAttak.



codice: 5125902
lunghezza: 250cm - colore: g/n

misure su richiesta - colore: grigio

tutte le resistenze vanno bene per temperatura positiva e negativa; per gli abbattitori ci sono quelle adatte per temperature di -35°, sono uguali alle altre ma cambia il codice. quelle disponibili anche in versione bassa temperatura sono indicate con un asterisco.
*alcuni modelli (evidenziati con fondo giallo) sono disponibili rettangolari già pronte per il montaggio, ma solo in determinate misure standard.
dovrai fornire le tue misure e noi ti daremo la disponibilità e le misure esatte.
